Free Printables Created by Michelle Ordever at www.thepurplepumpkinblog.co.uk

1. Print the desired number of boxes onto thick white paper or thin white card.
2. Cut each template out, and score along the lines as shown by the black lines (img.1). The line on the "lid" needs to be cut all the way through for the tab to slot into it.
3. Begin folding. I start with the straight (not diagonal!) lines, folding them inwards towards the un-printed side (img.2).
4. The diagonal lines get folded inwards too. You want to then make the two un-printed sides of the diagonal pieces touch, as they will form the outer flaps for the take-out box (img.3).
5. Fold the flaps over one another and staple into place (img.4). You could use a strong glue if you preferred, but staples are so much easier!
6. Fold the top flaps down and push the tab into the slot. That is the box complete!
7. You could add a wire handle if you have some wire to hand (I didn't for this demo)
8. Add some tissue paper, and some candy or even a fortune cookie, for a sweet party favor.
